

Food Service

6004 Series

Engineering Information:

- Flange can be screwed or riveted in place
- Housing material: stainless steel
- Typical wire sizes: #22 to #28 AWG
- Available in multiple lead and connector configurations
- Choose from the following sensing elements: NTC thermistor, RTD, or thermocouple
- RoHS compliant options available

Applications:

- Roller grills
- Convection, pizza ovens

Series Information:

The 6004 Food Service Series of food-grade stainless steel flange probes is an ideal choice for temperature measurement in hot liquids (closed-tip model recommended) or for air and gas (open-tip model recommended). These sensors are available in a variety of sizes and flange shapes, with open or closed tips, and with or without brazed flanges. Mounting flange is pre-drilled with a #6 hole to provide easy installation.

QTI can customize these sensors in a variety of ways. Sensor resistance values and accuracy, as well as cable length and color are all able to be specified.

QTI is the unparalleled leader in world-class temperature sensing technology with over for 40 years of proven expertise for the most demanding customers in the world. We custom-engineer the industry's most reliable temperature sensors for mission-critical applications. As a true business partner, we deliver beyond the products we make as we relentlessly pursue excellence in everything we do.
