

Boilers & Water Heating

6027 Series

Engineering Information:

- NTC thermistor probe assembly
- Available in a variety of rivet sizes
- Designed for harsh environments
- Ideal for overmolding
- Housing material options: stainless steel, anodized aluminum

Applications:

- Surface temperature sensing in water heating systems

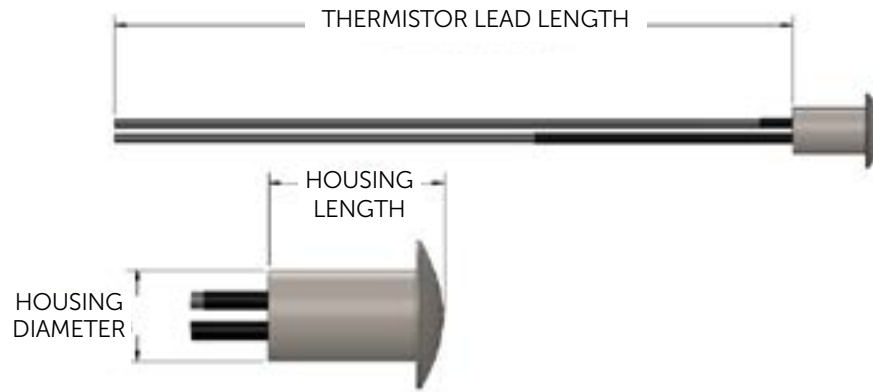

Series Information:

The 6027 Series is ideal for harsh environments and can easily be attached to flat surfaces due to its small size and light weight features. The riveted design allows for a clean-looking flush mount in water heaters and features an NTC thermistor sensing element.

QTI can customize these sensors in a variety of ways. Sensor resistance values and accuracy, as well as cable length and color are all able to be specified.

QTI is the unparalleled leader in world-class temperature sensing technology with over 40 years of proven expertise for the most demanding customers in the world. We custom-engineer the industry's most reliable temperature sensors for mission-critical applications. As a true business partner, we deliver beyond the products we make as we relentlessly pursue excellence in everything we do.
