

Food Service

6027 Series

Engineering Information:

- NTC thermistor assembly
- Available in a variety of rivet sizes
- Designed for harsh environments
- Ideal for overmolding
- Housing material options: stainless steel, anodized aluminum

Applications:

- Coffee makers
- Induction cookers
- Milk warmers/frothers
- Bread makers

Series Information:

The 6027 Series is ideal for harsh environments and can easily be attached to flat surfaces due to its small size and light weight features. The riveted design allows for a clean-looking flush mount on a variety of food service appliances that feature high temperatures including induction cookers, milk frothers, bread makers and more.

QTI can customize these sensors in a variety of ways. Sensor resistance values and accuracy, as well as cable length and color are all able to be specified.

QTI is the unparalleled leader in world-class temperature sensing technology with over for 40 years of proven expertise for the most demanding customers in the world. We custom-engineer the industry's most reliable temperature sensors for mission-critical applications. As a true business partner, we deliver beyond the products we make as we relentlessly pursue excellence in everything we do.
